PROFILE SUMMARY

Full-Stack Developer specializing in scalable web applications using Java (Spring Boot), React, and microservices. Experienced in building secure RESTful APIs, optimizing performance, and delivering reliable enterprise solutions in Agile environments. Focused on clean architecture and maintainable code.

PROFESSIONAL EXPERIENCE

FullStack Developer, Bonial

10/2025 – 02/2026
Germany(Remote)

- Migrated complex frontend modules from JavaScript to TypeScript, improving maintainability and type safety across large-scale applications.
- Designed and optimized reusable React components to enhance performance and reduce UI inconsistencies.
- Developed and maintained scalable backend services using Spring Boot within a microservices architecture.
- Improved API reliability and backend performance through structured error handling and service optimization.
- Collaborated in Agile (Scrum/Kanban) environments, contributing to sprint planning, backlog refinement, and continuous delivery.

Key Projects:

- **Bonial Console** – Retail SaaS platform for campaign and store-level performance management.
- **CDP Flight Manager** – Automated orchestration engine distributing localized ad campaigns using first-party intent data.

FullStack Developer, Yanyi

09/2024 – 08/2025
Germany (Remote)

- Built scalable frontend systems using React.js and TypeScript.
- Designed and implemented secure RESTful APIs using Spring Boot and Node.js.
- Secured APIs with OAuth2 and JWT authentication mechanisms.
- Optimized MySQL and MongoDB queries, improving data consistency and performance.
- Contributed to modular backend architecture and reliable release cycles in Agile teams.

Key Projects

- **AiTenderflow (Tenderflow)** – AI-powered tender and RFQ automation platform enabling end-to-end tender processing, from document analysis to offer generation.
- **CatalogAi** – an intelligent catalog management platform leveraging AI to automate product classification, data enrichment, and recommendation processes.

FullStack Developer, AlMergab

12/2022 – 09/2024
Doha (Hybrid)

- Designed and delivered enterprise-grade web applications using Angular and ReactJS for dynamic, scalable front-end development.
- Built and maintained RESTful APIs using NodeJS and ExpressJS, integrating MongoDB and MS SQL databases to ensure efficient data access, consistency, and reliable cross-system communication.

- Established and maintained CI/CD pipelines using GitHub Actions, Docker, and Jenkins, improving deployment reliability and significantly reducing manual release overhead.

Key Projects

- **MindPlatform** – AI-driven behavioral prediction platform enabling advanced data analysis and intelligent decision support.
- **Car Rental System** – End-to-end web-based vehicle booking and fleet management platform.

Fullstack Developer, Dwaya

06/2022 – 11/2022

Ariana(Remote)

- Developed full-stack features for a medicine home delivery application using ReactJS and Node.js/NestJS.
- Integrated third-party APIs to enhance application functionality and ensure responsive user experience.
- Documented technical features and actively participated in Agile sprint planning to streamline development processes.

Key Project

Dwaya - Scalable multi-platform solution designed to streamline medicine ordering and delivery workflows, improving operational efficiency and user experience.

Android Developer, ITGate

02/2019 – 05/2019

Sousse (On-site)

- Developed Android applications using Java and RxJS within an Agile/Scrum framework.
- Designed and implemented RESTful APIs for efficient backend integration, enhancing user experience.
- Optimized application performance through effective data flow management and UX/UI improvements.

Key Project

- **Restaurant Table Reservation System** – Scalable solution streamlining table bookings and improving customer experience.

Full Stack Developer (Intern), SOCIÉTÉ DE SERVICE ENTREPRISE DE TRANSPORT

07/2018 – 09/2018

Sfax(On-site)

- Created robust RESTful services utilizing Spring Boot and Spring Data JPA for efficient data handling.
- Integrated web services with Angular, significantly improving user interaction and experience.
- Participated in daily SCRUM meetings, contributing to Agile project discussions and progress tracking.

Key Project

- **PetroServCatering System** – A web-based platform streamlining food service operations for oil and gas companies.

EDUCATION

Bachelor of Engineering in Computer Engineering, ESPRIT

2022

Bachelor of Computer Science,

2019

École Supérieure des Sciences et de la Technologie de Ham

KEY SKILLS

Backend

- Java,
- Spring Boot,
- Microservices,
- REST APIs
- Hibernate/JPA, OAuth2, JWT
- NodeJs
- ExpressJs
- Cammunda

DevOps/CI-CD:

- Docker
- CI/CD,
- GitHub Actions, Jenkins

Frontend

- React.js
- Angular
- TypeScript
- Next.js

Tools/Collaboration:

- Git
- GitHub
- Bitbucket
- Jira
- Slack

LANGUAGES

- Arabic (Native)
- English (Professional)
- French (Professional)
